The King's Message to His People on the Silver Jubilee of His Reign

"AT THE CLOSE OF THIS MEMORABLE DAY I MUST SPEAK TO MY PEOPLE EVERYWHERE. YET HOW CAN I EXPRESS WHAT IS IN MY HEART? AS I PASSED THIS MORNING THROUGH CHEERING MULTITUDES TO AND FROM ST. PAUL'S CATHEDRAL, AS I THOUGHT THERE OF ALL THAT THESE TWENTY-FIVE YEARS HAD BROUGHT TO ME AND MY COUNTRY AND MY EMPIRE, HOW COULD I FAIL TO BE MOST DEEPLY MOVED? WORDS CANNOT EXPRESS MY THOUGHTS AND FEELINGS. I CAN ONLY SAY TO YOU, MY VERY DEAR PEOPLE, THAT THE QUEEN AND I THANK YOU FROM THE DEPTH OF OUR HEARTS FOR ALL THE LOYALTY AND, MAY I SAY, THE LOVE WITH WHICH THIS DAY AND ALWAYS YOU HAVE SURROUNDED US. I DEDICATE MYSELF ANEW TO YOUR SERVICE FOR THE YEARS THAT MAY STILL BE GIVEN TO ME. I LOOK BACK ON THE PAST WITH THANKFULNESS TO GOD. MY PEOPLE AND I HAVE COME THROUGH GREAT TRIALS AND DIFFICULTIES TOGETHER. THEY ARE NOT OVER. IN THE MIDST OF THESE DAYS OF REJOICING I GRIEVE TO THINK OF THE NUMBERS OF MY PEOPLE WHO ARE STILL WITHOUT WORK. WE OWE TO THEM, AND NOT LEAST TO THOSE SUFFERING FROM ANY FORM OF DISABILITY, ALL THE SYMPATHY AND HELP WE CAN GIVE TO THEM. I HOPE THAT DURING THIS JUBILEE YEAR WE BE OVERCOME IF WE MEET THEM WITH CONFIDENCE, COURAGE AND UNITY. SO I LOOK FORWARD TO THE FUTURE WITH FAITH AND HOPE. IT IS TO THE YOUNG THAT THE FUTURE BE HELPED, IN BODY, MIND AND CHARACTER, TO BECOME USEFUL CITIZENS. TO THE CHILDREN I WOULD LIKE TO SEND A SPECIAL MESSAGE. LET ME SAY THIS TO EACH OF THOSE WHOM MY WORDS MAY REACH. THE KING IS SPEAKING TO YOU. I ASK YOU TO REMEMBER THAT IN DAYS TO COME YOU WILL BE CITIZENS OF A GREAT EMPIRE. AS YOU GROW UP ALWAYS KEEP GREATLY TOUCHED BY ALL OF THE GREETINGS WHICH HAVE COME TO ME TODAY FROM MY DOMINIONS AND COLONIES, FROM INDIA, AND FROM THIS HOME COUNTRY. MY HEART GOES OUT TO ALL WHO MAY BE LISTENING TO ME NOW, WHEREVER YOU MAY BE, EITHER HERE AT HOME, IN TOWN OR VILLAGE, OR IN SOME FAR-OFF CORNER OF THE EMPIRE, OR MAYBE ON THE HIGH SEAS. LET ME END THESE WORDS TO YOU WITH THOSE THAT QUEEN VICTORIA USED AFTER HER DIAMOND JUBILEE THIRTY-EIGHT YEARS AGO. NO WORDS COULD MORE TRULY OF SIMPLY EXPRESS MY OWN DEEP FEELINGS: 'FROM MY HEART I THANK MY BELOVED PEOPLE; MAY GOD BLESS THEM.'"

GRIMSBY HONORS THE KING IN JUBILEE CELEBRATION

Large Gatherings in Moore's Theatre and Trinity Hall — Parade in Afternoon — Beacon Fire On Mountain — Jubilee Medals Presented To Miss Walsh, Mr. Forman and Col. Johnson — Rev. Mr. Merritt and Mr. Walter McRae Deliver Appropriate Addresses — School Children Lead Singing At Hall.

Citizens of Grimsby and district gathered at Moore's Theatre and at Trinity Hall on Monday to fittingly commemorate the King's Silver Jubilee and to testify to their loyalty and devotion to His Majesty and Queen Mary who throughout the past 25 years have so faithfully and outstandingly served the people of the Empire.

At Moore's Theatre a service of thanksgiving took place on Monday morning with the ministers of the town in charge, Rev. J. A. Ballard of St. Andrew's Anglican Church, acting as chairman.

In his introductory remarks Mr. Ballard said they were all proud to be citizens of the great British Empire. They were happy to share in the observance of the Jubilee and to pay a tribute of affection and esteem to the King and Queen and members of the royal family.

Following the singing of the hymn "O, God Our Help In Ages Past", Rev. I. B. Kaine, minister of the Presbyterian Church, read the scripture lesson after which prayer was offered by Rev. Mr. Earchman of the United Church.

The second hymn, "Unto the Hills" then followed after which Miss Mary Reid read an appropriate poem by Lady Spring-Rice, the words of which were sung as part of the service that day in St. Paul's Cathedral, London.

The address was given by Rev. Mr. Merritt of the Baptist Church who gave an interesting review of the life of King George. He spoke in part as follows:

"We have a King who is beloved of all the people of the Empire and peoples beyond the Empire. Is there another King or ruler who for 25 years has commanded the increasing respect and confidence of his people? Other royal houses have tottered and fallen. Our King and his family have grown in the favor of the people. He loves the people and has always manifested a sympathetic interest in them throughout his life. From early youth he made himself one of the people and fraternized with them and the people of all nations. He is a man of Christian character and Christian ideals and principles. Let us thank God that we have a King who honors the name of God."

Following the address the third hymn, "Faith of Our Fathers", was sung by the gathering after which the message of fealty to the King from the County of Lincoln, which appears in another column, was read by Mr. Kaine. Reeve Lawson, in referring to the message from the county said that a great deal of credit was due Reeve Mogg for the preparation of the document.

Presentations of Jubilee Medals were then made to recipients of Royal favour residing here. The presentation to Miss Harriet Walsh, former head mistress of Bishop Strachan School, Toronto, was made by Mayor McPherson in recognition of her outstanding service to the cause of Education.

Miss Walsh, in acknowledging the honor, referred to the fact that she had been present at the coronation of King George and said she could clearly recall the Golden Jubilee of Queen Victoria. She felt that through the presentation a tribute was being paid to the school for which she stood.

The presentation of a Jubilee medal to Mr. John Forman was made by

MAY MEETING TOWN COUNCIL

Court of Revision June 6th—To Beautify Cemetery—Erection Of Substantial Dwellings Advocated—Tax Arrears Penalty Now Same In All Municipalities.

Despite the fact the Grimsby town council disposed of a large budget of business at the special meeting held on Thursday evening, there remained further matters to be dealt with which occupied the attention of the town fathers at their regular meeting on Wednesday evening until after eleven o'clock.

Do Not Want Shack Town Further applications for building permits were received including one for \$150 for removal of a chicken house, occasioned considerable discussion. Councillor Chivers again expressing his opposition to permitting the erection of shacks. "We will have a shack town in twenty years if we allow shacks to be erected," he declared. "We expect people to come to Grimsby and build respectable dwellings," added the councillor.

Mayor McPherson took an equally strong stand. "We, in town, should try and see that people erect good substantial buildings that will be a credit to the community," said the Mayor. "I do not want to be a party to it. We should strive against slum (Continued on page 5)

Blossom Sunday To Be Observed On May 12

After several days of chilly weather during which there has been a heavy rainfall the sun made its appearance on Wednesday and prospects are now bright for warmer weather for the weekend in which event the blossoms will be in full bloom by Sunday which will, in all likelihood, be Blossom Sunday. The blossoms have been ready to burst into bloom, a couple of days of warm sunshine being the only thing needed.

Traffic over the highway during the past week-end was heavy and it is anticipated that the coming week-end will see an increased number visiting the Niagara Peninsula to see the blossoms which are an attracting sight and worth coming many miles to see.

Visitors To Grimsby On Blossom Sunday Are Heartily Welcome

The approach of Blossom Sunday which is to be observed on May 12th, prompted the passing of the following resolution at the May meeting of the Grimsby town council.

Moved by Reeve Mogg, seconded by Councillor Lothian and heartily endorsed by the council.

That the Mayor issue a proclamation calling upon all citizens on Blossom Sunday, May 12th, to show extra courtesy to blossom visitors and to consider themselves a committee to direct visitors to where the best showing of bloom may be seen and that an invitation is extended to all motorists and blossom visitors to make Grimsby their headquarters.

Card Of Thanks

The family of the late Mrs. Mary E. Durham takes this opportunity to thank the many friends for their kind expressions of sympathy, for the floral offerings and those who so kindly loaned cars during their recent bereavement.

PROCLAMATION

Pursuant to a Resolution of the Council of the Town of Grimsby, I hereby call upon all the citizens of the Town to show extra courtesy to all visitors to this district on Blossom Sunday, May 12th, 1935.

A cordial invitation is extended to visitors to the Fruit Belt to make Grimsby their headquarters.

Grimsby, Ontario, May 8th, 1935.

WATSON MCPHERSON, Mayor.

Blossom Time Music Festival This Week

The Blossom Time Music Festival appropriately held each year at this time, will be held on Thursday and Friday evenings of this week. It will afford an opportunity of hearing a Festival Chorus of 150 voices as well as other spheres which will make up an attractive program to be presented under the leadership of Gordon L. Eaton, director of music in the schools of Grimsby and district. Indications point to Trinity Hall being filled to capacity on both evenings.

Marriage

RUSS-JOHNSON—Married on Saturday, May 4th, 1935, at St. John's Presbyterian Manse by Rev. I. B. Kaine, Margaret Isabel, daughter of Mr. and Mrs. F. B. Johnson of Toronto to Ronald R. Russ, son of F. B. Russ, Grimsby Beach.

LINCOLN COUNTY'S MESSAGE OF FEALTY TO HIS MAJESTY

BY THE GRACE OF GOD OF GREAT BRITAIN, IRELAND, AND OF THE BRITISH DOMINIONS BEYOND THE SEAS, KING, DEFENDER OF THE FAITH, EMPEROR OF INDIA.

MAY IT PLEASE YOUR MAJESTY THE WARDEN AND MEMBERS OF THE LINCOLN COUNTY COUNCIL, situated in the Niagara Peninsula, Garden of Canada and in the Province of Ontario, being representatives duly elected by your Majesty's loyal subjects, with their consent and for them we send to you our loyal greetings on this the 25th Anniversary of your Ascension to the Throne of our Glorious Empire.

This historic Canadian County Salutes your Most Gracious Majesty as the First Gentleman of the Empire, as a great constitutional Sovereign by virtue of your own gifts, profound adherence to Christianity and your love of humanity. You have made your Throne that of all people and the bulwark of the liberty, freedom and of civilization. You, Sir, personify in yourself the highest aspirations of all our race.

And we pray to Almighty God that your Most Gracious Majesty and your Consort, Her Most Gracious Majesty, the Beloved Queen Mary, Edward, Prince of Wales, and all the members of the Royal Family may long be spared to us to continue your Rule, not only as a high example to all mankind, but to further bind together the great British Empire, our own League of Nations, Devoted ever to Peace.

Humbly submitted in fealty, love and devotion by the County Council of Lincoln, Province of Ontario, in the year of our Lord, this first day of May, 1935.

E. B. Osborne, Warden of the Co. of Lincoln, Reeve of Beamsville.
W. H. Harrison, Reeve of Niagara Town.
Wm. E. Nesbitt, Reeve of Merriton.
H. G. Mogg, Reeve of Grimsby.
C. A. Ansell, Reeve of Port Dalhousie.
B. Rirling, Reeve of Niagara Township.
Alex. E. Stewart, Reeve of Grantham Township.
J. R. Stork, Reeve of Louth Township.
Alex. E. Groff, Reeve of Clinton Township.
Jno. E. Lawson, Reeve of North Grimsby Township.
A. J. Dalrymple, Reeve of South Grimsby Township.
Jno. Langman, Reeve of Gainsboro Township.
Herbert Copeland, Reeve of Claxton Township.
Harvey Fawell, Dep. Reeve of Louth Township.
R. G. Dawson, Dep. Reeve of Niagara Township.
G. Arthur Watson, Dep. Reeve of Grantham Township.
Irwin E. Claus, Dep. Reeve of Clinton Township.
Peter Graham, Dep. Reeve of North Grimsby Township.
Camby Wiamer, Clerk and Treasurer.

The above is the wording inscribed on a beautiful parchment scroll, bound in morocco leather, and bearing the best wishes of the Lincoln County Council, which left St. Catharines last week for England, where it would be duly presented to King George.

The scroll is the product of the handicraft of J. G. Williams of the St. Catharines city hall staff and is a magnificent piece of work. A border about the parchment bears drawings of fruits and maple leaves. The scroll was executed in black and white and with its morocco cover and silk lining and ties is an artistic accomplishment of real beauty. The whole is enshrined in a leather covered case to ensure its safe arrival to the King.

SOFTBALL SEASON SOON TO OPEN

Various Teams Have Again Entered — Prospects For Very Successful League.

The softball season will open in about two weeks time and will be bigger and better than ever.

A meeting of the District Executive was held on Friday night last and Dr. Prior of Smithville will again be President and Doc Thompson of Beamsville will be Secretary, two good men and true.

His worship, Mayor Benjamin Heaslip, has entered St. Ann's in the big circuit and they should be a good asset to the league as they were very helpful last year.

Stoney Creek will also be with us. When it is considered that a team from this league went through to a championship last year, it means that all teams have got to be good. Beamsville, Grimsby Beach and Smithville are in again. Winona has until Friday to give their decision as to entry.

It is hoped they can make the grade. This club was a bit upsetting last year but this is another year. So you can imagine in a big way that the summer will be a big one for ball games.

The local team is working out every night and the same call is put out as in every year. If any boy or man would like a try out, manager McBride will be very glad to give them the chance as he is looking for new. Now after this call has been sent out material in order to strengthen team. Do not criticize those who are on the team and think there are better players standing on the side lines (Continued on page 5)

GRIMSBY AND N. GRIMSBY TO BUY FIRE TRUCK AND PUMPER

Grimsby Council Also Authorizes Purchase — Price \$2,785 — Half To Be Paid By Each Municipality — Fire Inspection On Buildings In Fire Limit "A" — Buildings Must Be Erected So As Not To Create Fire Hazard — No Relief Now Being Given In The Town of Grimsby.

At a special meeting of the Grimsby Town Council, held on Thursday evening last that body authorized the purchase of a new fire truck with pumper equipment at a cost of \$2,785, half of the outlay to be borne by the Township of North Grimsby. The equipment is to include a Bickle Rotary pump and is to be secured from the Bickle Fire Engines Limited, Woodstock. The truck will be a two-ton one and have a Chevrolet chassis.

A bylaw authorizing the purchase was given three readings and passed, the council accepting the recommendation of the joint fire committees of the two municipalities, the cost to be borne jointly, 50 per cent. by each.

One-third of the amount required is to be paid within thirty days of purchase, one-third on September 15th, and one-third on December 10th, 1935, all payments to be without interest.

Mayor McPherson noted the fact that the equipment it was proposed to purchase would last for years, 15 years being a short time for it to be in use considering the durability of modern present day trucks. The Mayor said we were able to buy today at as favourable a price as could be obtained up to the present, also having an unusual choice of equipment although he favoured another make of motor than that recommended. The township council desired early action, having been paying out money and not having the fire-fighting equipment they should have had.

Councillor Lothian favoured the purchase of a new fire truck, the old truck having got beyond the stage where it was a benefit to the township. He said they could economize in other directions to make the purchase possible.

Reeve Mogg also noted the amount of property lost by the township in assessment on account of the destruction of homes by fires, assessment being also lost to the county. He said we had to make up 7 per cent of the amount in the town of Grimsby. It was, he said, in the interests of the town to co-operate with the township for fire protection purposes, referring to the efforts of Warren Osborne, Reeve of Beamsville, to effect a similar arrangement between the village of Beamsville and the township of Clinton.

The resolution to purchase the truck and to pass the necessary bylaw was endorsed, Councillor Lewis voting nay.

When the matter of building permits came up for discussion Councillor Chivers asked whether it was customary for those erecting structures to submit plans to the council. "I think before we pass any permits we should see the plans. I will not support a motion for a three room house. Plans for buildings should first be passed upon by this council. The shed built without a permit in the fire area next to the fire hall is a fire trap."

Reeve Mogg—"It is high time to make an example of those erecting shacks without a permit. If we are going to allow the moving of shacks into town we are going to get into difficulties with undesirable tenants. Buildings must be erected so they will not be a fire hazard."

Mayor McPherson—"The building bylaw could be amended to cover the cases mentioned."

Longer Skirts Style Decree For Spring

Paris—"Longer skirts" is the decree of the latest fashion showing and, as the hemline came down, the fashion designers also began to get down to the serious business of establishing their edicts for spring styles.

In the midst of displays stressing slightly longer hemlines for 1935, Hein struck a new note by exhibiting skirts which were only seven or eight inches from the ground. They are designed with a soft gores fullness breaking away from the old tight line with the rest of the silhouette molding the bust and waist.

"Wear capes" was the next edict illustrated by a collection which displayed them in every length from waist to knee. Outstanding among them were models made of two to four silver fox pelts, framing the wearer's face and swooping around the arms. There were also hip-length evening capes of silver fox and ermine and three-quarter length wool capes topped with fur.

Full-length fitted coats in navy, black and grey wool, were often collarless and with cape-sleeves bordered and navy and silver foxes. They showed no fur next to the face.

Knew What She Wanted

Mrs. McGooly, who lives over the back road, rushed into the milliner's at Blue Springs greatly excited.

"My new hat has been trimmed on the wrong side," she said, "and it has to be altered."

"The trimming is on the left side

where it should be this season," replied the milliner.

"It makes no difference where it ought to be," continued Mrs. McGooly. "I must have it on the church side."

"Church side?" asked the milliner.

"Yes, church side. I sit next to the left wall, and I'm not going to pay for a lot of trimmings that can't be seen. I want it on the other side where all my friends in the congregation can see it."

Left Handed Advice

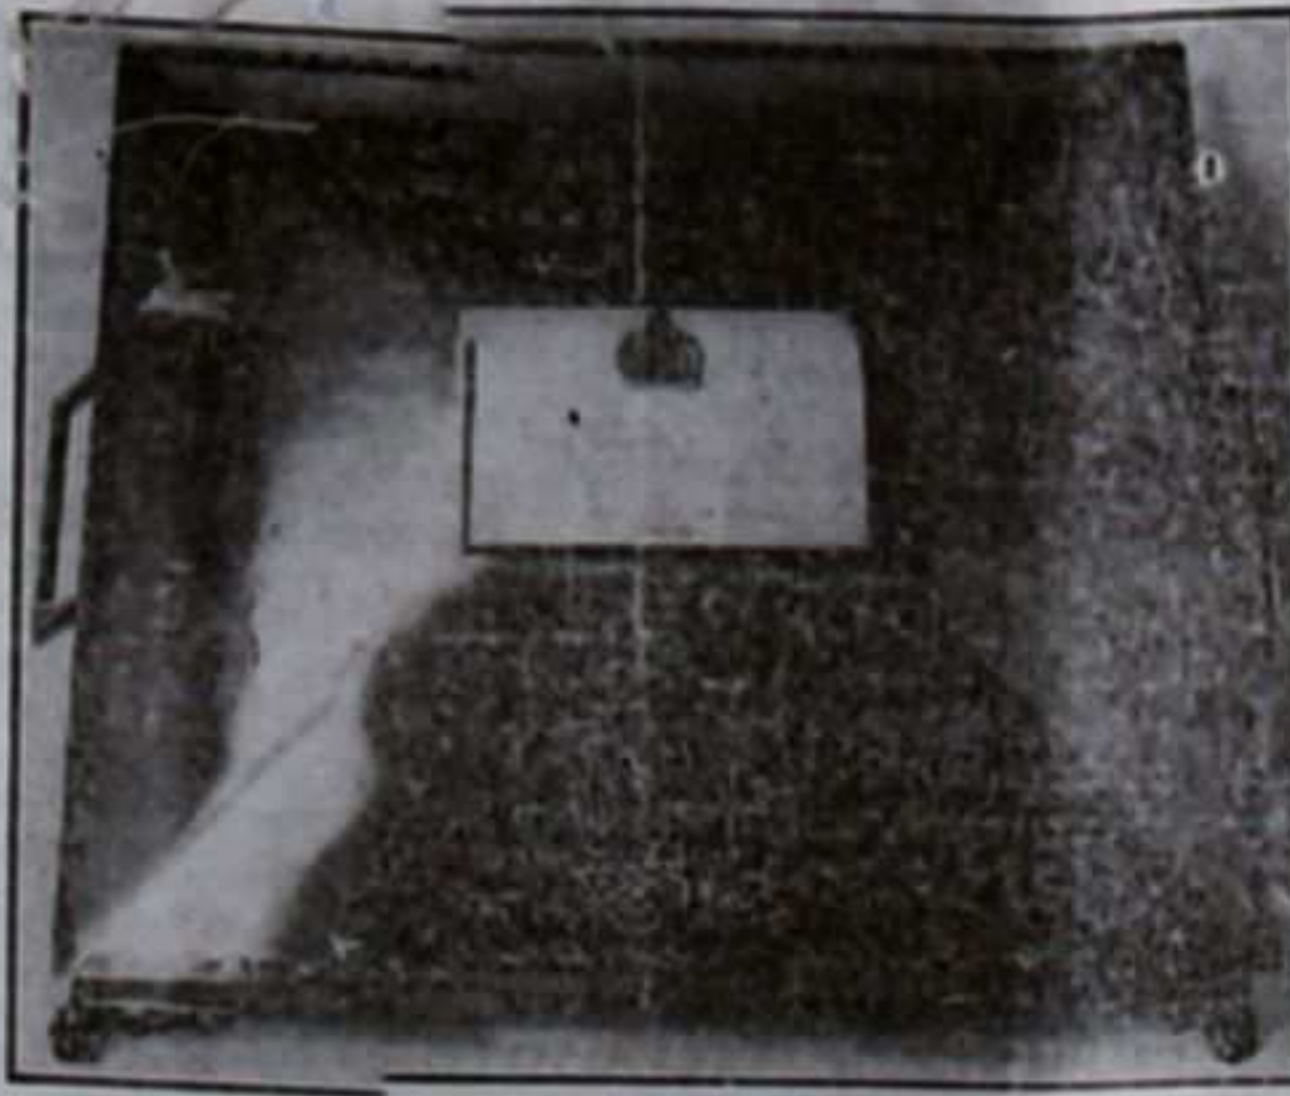

A young man who wished to get married wrote to his father asking his advice. He received the following advice:

"My Dear Son:—Your mother and I would like to see you happily married. She tells me to point out the many advantages—cozy fire-side, chair, slippers, pipe, and so on, with your darling wife sitting beside you. I am proud to know, my boy, that you have decided to settle down at last."

"P. S.—Your mother has just left the room. Keep single, you darned idiot—Father."

All have a share in the beauty. All have a part in the plan; What does it matter what duty Falls to the lot of man? Some one has blended the plaster, Some one has carried the stone; Neither the man nor the master, Ever has builded alone. Building a house for the King; Making a roof from the weather. Men have accomplished a thing. Only by working together.

Canada's Gift To The King

Perhaps the most precious single shipment that ever left Canada for Britain was placed in the strong room of the Cunard White Star liner Aquitania at New York.

This is none other than Canada's gift box to King George V. It is a gold box measuring 18 x 14 x 3 inches, elaborately decorated with hand-engraved crests of the nine Canadian provinces and the Dominion coat-of-arms, with maple leaf and crown borders.

The box was designed and made by Henry Birks & Sons, and its inscription read: "To His Most Excellent Majesty King George V., humble address of the Senate and the House of Commons of Canada on the occasion of His Majesty's Silver Jubilee, 1935."

The box was presented to His Majesty on May 8.

It was delivered to the Aquitania by an official of the Department of External Affairs, Ottawa, accompanied by a detective.

country lane, the local authorities have charge of all our roads. The Minister of Transport makes grants to the local authorities out of the road fund, but every time he wants to introduce some new principle into the road system he has to coax the local authorities into agreement.

The Picturesque Highways.

"Look at our traffic situation. More than 2,000,000 cars on the roads already, and 500 new ones going on the roads every day. Cars are getting so cheap that in five years' time everybody will have one. The motor industry is the most prosperous industry we have—but our roads are costing us 150 dead and 5,000 injured every week. Our roads are picturesque, but they were never built for motor traffic. In the United States the roads were made by Euclid. They are all geometric straight lines. The only thing to do is to begin all over again, and that's why I've got a five-year plan."

Mr. Hore-Belisha's five-year plan proved to be a re-planning of the traffic needs of Greater London. Already he has made British safety-conscious. After less than a year of the Hore-Belisha regime, motorists, cyclists and pedestrians are thinking and talking safety today as they have never done before.

The reporter brought him away from five-year plans and back to the immediate future by inquiring what other new road regulations he was preparing.

"Generally," he said, "we are taking over as much railway practice as we find useful on the roads. No doubt the railways have been influenced by the roads in the last few years. One of the most hopeful things about the roads today is the realization that we have much to learn from the railways. We have already copied their signalling system, and the beacons which mark pedestrians' crossings are also drawn from railway practice. In fact, we have copied the railways so well that some motorists say we have too many signal lights on the roads. Nevertheless, I think eventually we shall see the beacon system extended to pedestrians' crossings throughout the country."

"That, of course, will depend on the local highway authorities, and at this point we get the one outstanding difference between railway and road administration. The railways are under unified control. Your train leaves London on a track of 4 feet 8½ inches gauge, and the gauge remains the same all the way to Liverpool. But on the roads the width and surfacing change every time you cross a county line."

Tramways Segregated.

"Another piece of railway practice which we are getting introduced little by little on the roads is that of segregating traffic according to its type. We have got the principle of twin carriage ways on our main highways established, and lately we have got separate tracks for cyclists in Middlesex and Coventry. Another railway usage which I want to see adopted is the provision of hard rails at the curb to prevent pedestrians from stepping off into the heavy traffic of junction points. I have just got my first guardrail agreed to."

"And then there is railway law in fatal accidents. For years the railways have held a formal inquiry into the cause of every fatal accident. We can't hold a full-dress inquiry into every accident on the road but we can get at the causes of road fatalities by means which are almost as effective. So we have agreed to have an inquiry whenever a fatal accident occurs on the road. In this way we shall get the full light on the cause of accidents."

Another railway principle which we have taken over is the rule that the man who drives a vehicle must understand its mechanism. On the roads we have always imposed a

stiff test on the driver of public vehicles, but not on private drivers. Heretofore there has been nothing to prevent a private driver from buying £5 worth of old junk and putting this lethal apparatus down the public highway without anybody's knowing whether he was fit to be in charge of it or not. Beginning in April we are requiring all private drivers to undergo eye and ear tests and a few elementary driving tests. They will have to start their engines, carry out a turn in a confined space, back their cars between two posts and so on.

"Also, we shall make certain that they know the highway code. It is a reasonable assumption that every driver has a copy of the code because it is issued to him with his driving license, but hereafter we shall be sure that he has read it. Incidentally, we shall have a new code before long."

Changes in Speed Limit.

"Another innovation has been a change in the speed limit. Heretofore we have had a limit of thirty miles an hour on heavy cars, but no limit on light cars. The police could prosecute the driver of a light car for dangerous or careless or negligent driving, but not for exceeding a speed limit. We have now imposed a limit of thirty miles an hour on all cars in built-up areas. At the same time we are doing away with the speed limit on the new by-pass roads. I believe that all these changes are in the right direction. If we can give the user of the roads every possible safety device, if we can compel vehicles to conform to safety standards, if we can get a high standard of future road construction adopted I believe that our road traffic will eventually begin to flow with some of the safety which rail traffic has achieved."

Quick Turnover

Well-dressed, suffering from three days' hunger, a young man knocked at a farmhouse near Akron. Time: 7 a.m.

"Good morning," to the farmer, "I am an advertising man out of work. I'm starved. Wonder if you'd please give me some breakfast? I'll be glad to do what I can to repay you."

"What did you say your work was?" he asked.

"I'm an advertising man," he replied.

"Well, young man, we can do business. I've been trying to sell this farm for a long time. If you'll write me a For-Sale ad, I'll give you breakfast."

The young man prepared the copy and handed it to the farmer, who read:

SACRIFICING FOR QUICK SALE—Beautiful modern country home on State Road; 250 acres of fertile farm land; rolling green pastures; virgin forests, whose safety trees defy the ages. Spring-fed brooks wind their way inauspiciously through fields of rich, black soil, providing adequate cool water for all livestock. Truly a garden spot of the world.

The farmer halted for breath and cried:

"Where is this farm?"

"Right here," replied the young man.

"The heck it is," said the farmer. "Guess I'll keep it myself."

Store Will Try Five-Day Week

Kitchener.—The five-day week scheme will be given a trial for three months by A. R. Goudie, proprietor of Kitchener's largest departmental store. During June, July and August his store will remain closed all day Monday, but will stay open Wednesday afternoon, the traditional half-holiday here. The innovation is admittedly an experiment and was favorably voted upon by the employees.

That Nice Shore Moss

(Annapolis Royal Spectator)

That Carrageen Moss (often known as Irish Moss) has become the subject of recognized medical attention and value will not be surprising to the shore dwellers of Maine and western Nova Scotia who have long picked it and bleached it and dried it and used it for a healthful jelly. It grows on the rocks at the edge of low water and is a delicate greenish white color, somewhat like coral in appearance, but perfectly soft, and when dried and bleached becomes quite white, in which state it will keep indefinitely, making a lovely jelly that can be flavored and used as a food by the most delicate people.

Now comes Miss Margaret Ruth Butler, of the Department of Biochemistry of the University of Toronto, with a very comprehensive brochure printed at the University Press in Cambridge, England, telling all about the substance, scientifically, chemically and culinarily. She says the proper name of the substance is "Chondrus Crispus" and she has evolved a method whereby it may be reduced to salts and made an article of commerce in that form. Description of the method in the pamphlet seems to be technical, very complete but people who have been familiar with its value in a homey way won't bother to convert it into salts any more than they will worry as to the value of balm-of-gilead balsam for cuts and coughs, or real spruce gum as something nice to chew.

Aint It The Truth?

Slow up at the railroad track—It only takes a minute—And then your car will start again, And better yet, you're in it!

Off For Polo Games

Stephen (Laddie) Sanford, noted U.S. society polo star, and Mrs. Sanford, the former Mary Duncan, stage and screen beauty, pictured as they sailed from New York City. They are enroute to England where Sanford will compete in polo matches.

DIABETES GAINING

McGill Professor Advises Ways of Happiness and Comfort

Toronto.—Addressing the joint convention of the Quebec and Ontario dietetic associations at Ottawa, recently, Dr. L. M. Rabinowitch, assistant professor of medicine, McGill University, gave some hopeful information on diabetes.

There will always be diabetes, said Dr. Rabinowitch, because heredity is one of the important causes of the condition. Diabetes is also on the increase and, it is, therefore, important to make every effort to control the condition—not only to prolong life, but, also, to keep the diabetic happy. At no time in my experience with diabetes, may I, therefore, say have I felt more optimistic than at present, in view of our experiences during the last five years with our high carbohydrate—low calorie diet and these experiences fit in with a variety of data of animal experiments which have accumulated during the same period of time. These data clearly show that it is now necessary to pay attention to parts of the body other than the pancreas; that the pancreas is not alone the important factor in the production of diabetes. As a matter of fact it is now possible to completely remove the pancreas from an animal and that animal will either not develop diabetes or the disease, at the most, will be very mild. This is made possible by simultaneous removal of the pituitary gland. An animal in which the pancreas and pituitary was removed simultaneously was kept alive in the biochemical laboratory at McGill University for about eight months without any diet or insulin and when the animal died the death was not due to diabetic coma.

FOOD INFLUENCE

There are also a variety of parallel experiences with respect to the influence of different types of food on carbohydrate tolerance and upon the susceptibility to insulin. These clearly show that a diet rich in carbohydrates improves, whereas fats impair, carbohydrate tolerance; and that a diet rich in carbohydrates increases, whereas fats decrease, the sensitivity of animal and man to insulin. Our early experiences with the high carbohydrate diet reported in 1929 have now been well confirmed in other clinics. The first result with this diet is that the patient feels, and looks, better and there is a lesser tendency towards infection. The second result is that there is a lesser tendency to break diet, because with this diet, the diabetic may have bread, potato, marmalade on his toast, and sugar on cereal, or in tea and coffee. The third result is that the diet is applicable to all types of diabetes. The fourth result is the marked decrease in the incidence of coma. Coma has almost completely disappeared in our clinic; we now see three to five cases a year only and the reason is that this diet deprives the diabetic of that food which is necessary to produce coma, namely, fat. A fifth result with this diet, is that less diabetes require insulin and, of those who do require it, the average dose is less than with the older types of diets. Lastly, and a very important result with this diet, is that treatment is greatly simplified. None of our diabetics are now subjected to the old type of education, where it was necessary for them to know about carbohydrate, fat, protein and caloric values of food materials; nor are scales necessary with this diet—the best proof is that we are now experiencing our lowest incidences of morbidity and mortality.

Oakville Man Invents Highway "Safety Line"

Oakville.—This town may yet be accorded the honor of inventing the "safety line" now universally used to mark the centre of highways at curves and danger points, if Chief of Police David Kerr is correct in his reckoning.

Stirred by the nation-wide search for the inventor or originator of the safety line, the chief harked back to his early days in Oakville and remembered that W. H. Sweet, chief constable of this town nearly 20 years ago, had the then town foreman, George MacLaren, paint a black line down the centre of the highway from Navy Street to Dundas Street.

Small sections of this line are still visible, while the line was not originally intended as a safety measure, but to aid in settling disputes between motorists as to the right-of-way. It was soon adopted by Hamilton, where the color was changed from black to white and has since become one of the greatest safety devices on the continent.

New Body Controls 24,000

Toronto.—The newly-formed Canadian Curling Association is estimated to have jurisdiction over 24,000 curlers throughout the country and 913 clubs. Eleven governing bodies, most of them provincial or organizations, took part in the formation of the national association.

STYLE CHANGE

The girl who used to spend a lot of time in front of the glass making sure her hat was on straight now spends the same amount of time making sure it isn't. — St. Thomas Times-Journal.

MENTALLY ILL.

There is decided merit in the proposal of the Hon. Dr. J. A. Faulkner, the provincial Minister of Health, that the word "insane" shall be deleted from Ontario's statutes wherever it may occur and be replaced by the phrase "mentally ill and defective." We have made much progress from that dim period in which individuals suffering from mental illness were considered to be in such a hopeless state that they were confined in virtual prisons and set apart from the world for the remainder of their days.—Brookville Recorder.

ISLAND STEPPING STONES

Soon every little island in the ocean is going to find itself important and it is certain that, with aviation developing as it is, places which in the past have not even been spots on the map will become centres of interest. Here, for instance, is the case of the Wake Islands, away out in the Pacific Ocean. These are three small islets, with a total area of not more than 2,600 acres, yet they are to be a point of call on the proposed U.S.-China air route, plans for which are now well under way with Pan-American Airways and the United States Government co-operating. —Sault Star.

BRITAIN'S PROGRESS

The soundness of the basis on which British recovery has been built is shown more clearly than ever in Neville Chamberlain's budget for the coming year. The average Briton's standard of living has steadily improved. The cost of living last year was substantially below the level of 1921, when the National Government came into power. Industrial production rose 12 per cent. last year; exports increased \$145,000,000.—Winnipeg Tribune.

"THE STAGGERING TOTAL"

Any attempt to establish the absolute total of direct and indirect victims of the war in the whole world, Professor Hersh of the University of Geneva sums up, "is doomed to failure." In the first place "because we lack reliable data for the backward countries." But, he adds, "even with these gaps we arrive at the following approximate estimates" of deaths directly and indirectly attributable to the world war:

Europe 12,637,000 12,219,000

America 170,000 1,500,000

Asia 63,000 12,000,000

Africa 50,000 900,000

Oceania 70,000 600,000

13,055,000 28,219,000

Which gives the staggering total of "early 42 million people destroyed"—a number actually greater than the population of France, England and Wales, and four times as great as the total population of the Dominion of Canada.—Halifax Herald.

A SPECULATION.

The population of the United States in 1929 was 5,308,000, less than half the population of Canada today. Even in 1929 it did not exceed 9,550,000, or 1,500,000 less than the number of people who live in this Dominion now. The rate of increase, however, was consistently greater than that of Canada, owing to the heavy immigration which continued until drastic restrictive regulations were imposed fifteen or twenty years ago. When economic conditions have improved it may be predicted that Canada's population will increase at a greater rate than at any other time in her history and may reach 23,000,000 within the next two decades. —Victoria Times.

ORGANIZED CHILDHOOD

The school child of twenty years ago knew little or nothing of airplanes or radio or automobiles, but today these are a part of his life. Child life is also organized today as never before with Boy Scouts, Girl Guides, camps, clubs, choirs and athletic teams. To prove a statement of relating education to this more civilized existence is in itself a problem of importance.—London Free Press.

PARADOX ON THE FARM.

Although the Washington Government has taken unprecedented steps in the last two years to relax farm production, an odd turn of event has resulted in a substantial increase in the number of farmers. Census bureau officials estimate that at least half a million new farms have sprung up in the United States during the depression. For the most part, it is believed that this is due to the return to rural areas of city folk whose jobs vanished when factories shut down. Over a period of many years the American farm population steadily declined. It is surprising enough to find this trend reversed, over a five-year stretch; but to try to understand just how this reversal fits in with reducing farm production is quite a task.—Quebec Chronicle-Telegraph.

These two members of Toronto's Chinese Boy Scout Troop were among the 2,000 Scouts taking part in their annual old clothing collection in that city, when 180,000 articles of clothing and thousands of pairs of shoes were gathered for distribution to the needy.

Building Trade Has Reason To Be Optimistic

The building trade in Toronto and vicinity has reason to feel encouraged over existing conditions. With the stimulus furnished by the Federal Government in the construction of the Armouries on Fleet Street, and the large addition to the Federal Building on Front Street, the report of the issue of permits issued by Building Commissioner K. S. Gillies is reassuring. For the month of March, according to Building in Canada, the permits granted exceeded in value those for the entire first three months of 1934. They totalled last month \$1,021,677, as compared with \$322,662 for the corresponding month last year. During the first three months of this year the permits reached an aggregate value of \$2,892,415, as compared with \$793,765 for the first quarter of 1934.

Activity is apparent in Leaside, with twenty-five new homes under construction. Forest Hill has evidently another active building year in prospect. Permits to the value of \$218,575 were issued by Commissioner MacNicol during the first three months of the current year, as compared with \$191,150 for the similar 1934 period. In Etobicoke, permits issued between January 1st and March 31st this year totalled \$119,583, as compared with \$112,150 in 1934. In York Township a gain of nearly 600 per cent. in building permit values is reported for March. Real estate activity is indicated in these Toronto suburban areas, and the outlook is brightening.

Intense interest centres in the recommendations made to Parliament by the Ganong Housing Committee. The plan put forward is that the public treasury lend \$50,000,000 to be matched by \$50,000,000 from private sources to finance a national house-building scheme. The expenditure of \$250,000,000 on such a project would go far to galvanize the building trade into new life and to stimulate many industries engaged in the production of building supplies. Nothing would do more to increase employment.—Toronto Mail & Empire.

MATERNITY CHEMISTRY

Prolectin Used to Stimulate the
Motherly Instinct

The motherly instinct is something that can be soon purchased in the corner drug store. Two properly compounded pills a day, or an occasional injection, will make the hardest-hearted woman yearn for children and gather those of the next-door neighbor unto her. The chemical that performs this miracle is prolectin, about which Dr. Oscar Riddle of the Carnegie Institution of Washington, has been telling us much of recent years in various scientific publications.

Prolectin is a hormone—an extract of the anterior lobe of the pituitary body which lies at the base of the brain. Dr. Riddle injected it into very young female doves with astonishing results. They nested, brooded and conducted themselves like actual mothers—in deed, were ready to become mothers. Administered to mammals, to hormone started the breasts growing and caused them to produce milk. Already prolectin is a boon to physicians who specialize in the care of babies and mothers.

At the meeting of the American Physiological Society, Dr. Riddle summarized the results of more recent laboratory studies made by himself and his collaborators, Drs. Ernest L. Lahr and Robert W. Bates. Rats prove to be just as satisfactory animals for experimentation as doves. Their one interest in life, after a few doses of prolectin, is their young. The effect is almost instantaneous in twenty-four to forty-eight hours after the first injection.

EFFECTS OF PROLECTIN
From the anterior lobe of the pituitary body a follicle-stimulating hormone can be extracted as well as prolectin. The two have opposite effects. Heat prolectin to destroy the growth hormone. Inject it into a male dove and the result is nearly the same as castration. The mating instinct is gone. On the other hand, the pituitary follicle-stimulating hormone makes a Lothario of any male dove. He is all for love-making. Mares serum has the same effect on him but fails to arouse the maternal instinct in females. Going still further, Drs. Riddle, Bates and Lahr experimented with the anterior pituitaries of embryo calves, new-born calves, adult bulls and steers, and cows in different stages of pregnancy. Again doves received the injections—this time a combination of prolectin, the follicle-stimulating and a third hormone which somehow stirs up the thyroid gland, even though it is situated in the neck and therefore far from the pituitary.

Germany has the highest marriage rate—over ten per thousand of the population—in Europe. The next is Poland with 8.5, Holland and Italy with 7.6, England with 7, and France with 6.2.

We pray for our daily bread, but we want a lot of butter and meat and something pleasant to wash it down with and plenty of gas thrown in.

When her father, Richard Brinn, was appointed lighthouse keeper at Discovery Island in the '70's, Mary Ann went there to live and she took over from her father at the turn of the century. She maintained the light until her retirement in 1932.

Last October, Mrs. Croft was honored by the King with the Imperial Service Medal for devotion to duty.

MAPLE SYRUP CROP IS WORTH MILLIONS TO THE FARMER

The mild, sunny days of late March and early April will be worth more than \$3,000,000 this year to the farmers of southeastern Quebec and the Province of Ontario.

The output of maple sugar in Canada averages around 5,000,000 lbs. annually at the present time, and that of maple syrup approximately 2,000,000 gallons, with a total value of more than \$3,000,000. This output is produced by nearly 50,000 farmers in Central Canada and the total number of trees now being tapped annually ranges between twenty and twenty-five million. Six years ago the total output of maple products was valued at about \$6,000,000, but since then the trade in maple products, as in many other lines, has been considerably reduced.

The tapping of maple trees goes back to the Indian days, on the eastern seaboard, and while little appears in history about their method of extracting the sap and rendering it into syrup, references are found to the tribal dances, known as the maple dances, held in the spring. It was not until 1855 however that the maple syrup industry began to receive prominence in the reports of the governors and intendents of New France. Towards the end of the 18th century, the industry gained recognition as a commercial venture of some magnitude. Much of the advancement of the industry is attributed to modern methods of collecting and boiling the sap, making refining simple and profitable. Although maple syrup and sugar making are still carried on in a more or less primitive way in some sections, there are also a number of refineries using high-speed, scientific machinery for the purpose.

Gold can be beaten out so thin that one ounce will cover an area of 140 square feet.

Our Sketch Club

the Previous Lessons

Review No. 51, we studied in Lesson Technique. A very tone in subject and one I derived important benefit from myself, a great deal of this feature again, in going back to this feature again. So the thought came into my mind, that it would be practical for our that it would go back at this phase students to review the work of our lessons.

You will remember in Lesson No. 1, we made a statement that anyone who could learn to write, could also learn to draw. No doubt you all learn to with me that the statement now agree so much as it may at that time have appeared to be, that we started this Sketch Club since we started this Sketch Club indicate that the time has been well and profitably spent.

As in Lesson No. 1, we practiced on strokes or lines as used in writing, so, we too, continued doing the same in Lesson No. 2, by carrying on with these lines and developing them into simple borders. Then we studied the sketching of an apple in the four stages of outline, to a finished drawing in full shaded effect, demonstrating the three dimensions of height, breadth and depth or thickness. The lines and borders were drawn with pen and ink, and the apple with lead pencil or a crayon pencil.

Then continuing the study of crayon technique we practiced drawing tones in lines, shading a sphere and cylinder. We also gave you some problems to draw with each lesson and answered any questions which our students required assistance with, as they were confronted with various problems.

With the work of Lesson No. 4, we assembled crayon lines into a pictorial effect representing portions of a brick wall, a stone coping, and some foliage. As one problem for this lesson you were asked to assemble the wall, coping and foliage to form a composition in pictorial effect, which we illustrated in Lesson No. 6, to show the finished result.

In Lesson No. 5, we studied the use of spread lines for pictorial effects. You were asked to make a pen line drawing from a half-tone reproduction of a dish of apples.

The method of enlarging and reducing the size of a sketch was explained in Lesson No. 6, by using a rectangle and a diagonal line. We also studied the correct procedure of how to enlarge the apple drawing from the previous lesson.

Lesson No. 7, brought out the problem of drawing three cubes resting one above the other and three different colors or tones of cubes. Then we also studied the light and shade effect of these cubes and a cast shadow upon a cylinder. The problem of a hollow hexagon was also explained and illustrated.

We took up our first study on Landscape Drawing with Lesson No. 8. We here studied the use of a Range Finder to select compositions. Then we announced a Landscape Sketching Contest and offered three illustrations by prominent Canadian artists for prizes.

Lesson No. 9, we continued the use of a Range Finder, and also how to change a bit of scenery around in order to make a new composition. Lesson No. 10, illustrates new uses of pen and ink, and also brush techniques, together with the use of white paint combined with pen lines.

The method of using a decorative technique of landscape for advertising purposes was demonstrated in Lesson No. 11. We also studied pen stipple and scatter work by the tooth brush.

Lesson No. 12, brought out the filling away of sample pictures for future reference. Lesson No. 13, was given over to answering special questions and problems submitted by our students, this proved to be very interesting and helpful to both the Art Director as well as the students. Lesson No. 14, was a continuation of study on tree trunks.

Trees in different atmospheric conditions were dealt with in Lesson No. 17, such as seen in rain or snow effects. Strong sunlight effects on trees was studied in Lesson No. 18 together with the effective use of the crayon pencil for sketching certain kinds of trees.

Pine needles, section of tall grasses upon water, stone and grass in strong sunlight was studied in Lesson No. 19. Lessons 20 and 21 taught the value of carrying around a sketch book with you when out walking, so that important and valuable little bits of useful material may be recorded and then filed for future reference.

Lesson No. 22, changes the scene and boats, and birds. The winners of our Sketching Contest were announced and prizes sent out to the three lucky winners.

Contrasts in ocean going boats or shipwrecks illustrated in Lesson No. 23, a modern and early shipping events. A test drawing was asked for in illustrating with pen lines a pictorial scene of water, horizon and

sky, showing clouds and reflections. Lesson No. 24, changes the scene to yachts. Then more contrast in boats as used on Lake Ontario as shown by the use of paddle steamers and modern turbine engine ships in Lesson No. 25.

We went back again to yachts in Lesson No. 26. Small dinghies, both pleasure and racing yachts and also steam ships were illustrated, also a decorative bit of design suitable for marine subjects.

Lesson No. 27 takes us into a study of battleships, and specimens of "The British Navy" were illustrated here. Lesson No. 28 continued this study on "The Navy" and its "Jolly Tars." Notes on Wooden Ships were discussed here too.

Notes on Viking Ships were printed in Lesson No. 29. Also a splendid example of a combination of pen lines with the use of the crayon pencil in illustrating a modern liner against the sea and sky.

In Lessons No. 29 and No. 32 we commenced a series of features in outline drawing such as the Captain, an Anchor, a Ship's Cutter.

Lesson No. 33 was given over to answering questions and various problems sent in by our students. A study of Design was commenced in Lesson No. 35. The use of a "Docket" or "Time Sheet" was mentioned in Lesson No. 35. Also a filing system for pictures: clipped for reference. Lesson No. 36 and 37 brought up the subject of tools or instruments. Also practical problems were set out for the students to create in design work. Lesson No. 38, Suggestions for Design were given and then The Principles of Design in Lesson No. 39.

Lesson No. 40, taught Rhythm, Balance Harmony and the same subjects were continued in Lesson No. 41. We then had a chat on Design for Surface Patterns in Lesson No. 42. Rhythm and Surface Patterns were discussed in Lesson No. 43. Flowing Rhythm in Lesson No. 44. Flowing Rhythm and Repetition in Lesson No. 45. Flowing Rhythm in Natural Leaf Forms in Lesson No. 46. Rhythmic arrangements in Lesson No. 47. Rhythmic Arrangements of Simple Pattern over a surface in Lesson No. 48. Flowing Rhythmic Pattern in Lesson No. 49. Simple Rhythm, Flowing Rhythm, Tone Rhythm in Lesson No. 50.

Then in Lesson No. 51 we took up the study of Tone in Line Technique, this being a very important study as will be seen in the near future. Master this important feature of Tone and all will be well.

Questions will be answered, etc. Questions will be answered in this department. Anyone wishing to receive a personal reply may have same if a 3c stamped, addressed envelope is enclosed with the request. The Art Director, Our Sketch Club, 73 Adelaide Street, West, Toronto.

LAMB ONE OF BEST OF MEATS

In Biblical days lamb, unblemished and of a fine quality, was offered up in sacrifice, and even today in the Holy Land lamb is the chosen meat for religious feasts.

In Canada lamb was first used as a farm meat in the early days of settlement at logging camps, barn raisings, and other festive gatherings. In those days lamb owed its popularity to the fact that it was fresh-killed, thus possessing all the quality of a high-class farm product. Nowadays, after a lull in popular favour, the fine flavour of lamb is once again being appreciated and the lamb is becoming more general in Canadian homes. With modern packing-house facilities, with the Dominion Department of Agriculture meat inspection service, and with the sheep industry well organized, choice delicately flavored lamb is now available for the retail trade in Canada all the year round.

At this season of the year, a regular supply of freshly-killed carcasses from Prairie raised range lambs fattened in feed lots throughout Canada on the best of clover or alfalfa hay and Canadian grains are on display in meat stores and butcher shops. Roasts and chops from these carcasses are tender, carrying a large amount of juicy, lean meat. Dinners served from

ARE YOU MISERABLE?
Mrs. A. Clarke of 73 Charles St., Hamilton, Ont., said: "When growing into womanhood I became pale and thin, had no much appetite, suffered from headaches, pains in my back and cramps. Mother gave me Dr. Kerec's Favorite Prescription. Soon my appetite improved, I had better color and all pains disappeared." All druggists.

New also, tablets 50 cts., liquid \$1.00.

Issue No. 18—35

this meat are particularly appetizing. The satisfaction resulting from the purchase of lamb in any of its many cuts has steadily increased the volume of sales so that today an ever increasing number of families are becoming regular users of lamb.

THE FEED SITUATION IN CANADA

There are several factors which will influence the feed situation in Canada in 1935, says the 1935 "Agriculture Situation and Outlook" about to be published by the Dominion Department of Agriculture, in co-operation with the Department of Trade and Commerce. Feed reserves will be considerably less than normal owing to low yields in 1934, domestic requirements in drought areas, and strong export demand from the United States. Meadows and pastures in large sections of eastern Canada, which were seeded in 1933, and also in 1934, will show the effects of subsequent adverse climatic conditions. The restricted seed supplies of grass, clover and alfalfa, coupled with high prices, is expected to reduce the acreage of these crops seeded in 1935. In the drought areas of the Prairie Provinces, less summer-fallowed land than usual, and low reserves of subsoil moisture, are unfavourable conditions for the seeding of grasses and legumes. To these adverse factors may be added also the possibility in 1935 of some crop destruction in the Prairie Provinces from grasshoppers and cutworms, and to a lesser extent, in a part of the Province of Quebec, from white grubs.

Grasshoppers, which took a heavy toll of forage crops last year in the Prairie Provinces, are expected to be less troublesome in 1935 than in 1934, on account of a reduction in the intensity of infestation in all three provinces, the smaller number of eggs to be found in stubble land, and the greater skill on the part of the farmers in carrying on control campaigns. The pale western cutworm is expected to be present again over wide areas in Saskatchewan and Alberta. If moisture conditions and weather for growing crops in the early part of the season are not better than average, considerable losses may be expected in certain large, though scattered localities. Wherever grasshoppers and cutworms are known to be present, tillage and seeding practices should be followed which are in keeping with recommended methods of control.

**\$100,000,000 Gain
In Tourists Seen**
Total of \$300,000,000 For
Business in Canada For
1935 Forecast
Ottawa.—The return from the tourist business in Canada will approximate \$300,000,000 in 1935, representing an increase of \$100,000,000 over 1934, D. L. Dolan, director of the Canadian Tourist Bureau, told the Senate Tourist Committee recently. "More people in the United States are looking to Canada for tourist purposes than ever before," the official said. "There is a tremendous increase in Canadian travel." A sum approximating \$25,000 will be spent this year in Canadian newspapers and magazines advertising the tourist trade of this country, he said. It was most important to develop interprovincial tourist traffic, Senator Dennis said. \$150,000 TO BE SPENT
The amount to be spent this year in advertising this country's tourist

COULD NOT SEW A BUTTON ON

Her Hands Were Helpless
With Rheumatism

At one time she thought she would lose the use of her right hand. But "a blessing"—in the form of Kruschen Salts—put her right again. "I was sure in a bad state," she writes. "In fact, I could not do my housework. I was so bad with rheumatism in my arms and hands, I could not sleep at nights, and I thought I would lose the use of my right hand. I could not hold any thing, nor could I sew a button on. My arm would go dead. I was advised to try Kruschen, and inside of three weeks I found such a change. I have kept on taking it, and now I sleep all night—thanks to Kruschen's help and relief."—(Mrs.) J. H.

Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals, which are responsible for rheumatic agony. Other ingredients of these salts assist Nature to expel these dissolved crystals through the natural channels.

attractions in the United States, which was an important market for the promotion of Canada's tourist trade, will approximate about \$150,000, the official said.

Mr. Dennis asked whether the question of the use of the radio in conjunction with the Canadian newspapers and magazines in developing tourist trade between the different Canadian provinces had been considered.

A suggestion was under consideration by which the Canadian Radio Broadcasting Commission might allot a few minutes two or three times a week at the end of the day's program to giving facts on the tourist attractions in the East and West, he replied.

The total amount spent on advertising up to the end of this month estimated at \$50,025 by Mr. Dolan.

One Canadian campaign cost \$12,000 and the first advertising campaign in the United States last August cost \$17,525, he said. The second United States campaign had cost about \$45,000.

TOTAL OUTLAY IS \$92,000.
The total expenditure by the Bureau amounted to \$92,000 up to the present, he said. The Bureau was closing the present fiscal year with a balance of \$4,000 of its appropriation.

In the August campaign in the United States 49 newspapers in 23 cities covering 17 states were utilized, he said.

Many inquiries had been received from the United States as a consequence of the August campaign, and much information was received which helped the bureau in launching its campaign this spring, he added.

The information indicated that the best sources of tourist traffic from the United States were: New York, Pennsylvania, Ohio, Illinois, Wisconsin, Missouri, California, Minnesota, Iowa, Kansas, Michigan and Indiana. The main inquiries received, he said, were about hunting and fishing, motoring and national parks.

"Our statistics as to the source from which we draw our most tourist trade is the same and agrees with those of the railways and steamship companies over a period of years," he said.

The bureau had consulted the provinces, the railways and tourist bureaus in different cities so as to meet the wishes of these various organizations in regard to the "general plan in their own provinces," he said.

Senator W. A. Buchanan (Lib., Leithbridge) urged the importance of promoting the tourist business among farmers. For this purpose Senator Buchanan said, the occasion for public speaking by tourist officials should be seized.

A STRANGE CHINESE CUSTOM

FROM remote parts of China come mysterious stories of prisoners deprived of Salt, a form of torture and death. Local Items of Interest

Daylight Saving went into effect in Grimsby on Saturday last at midnight and remains in force until September.

Traffic officers are making a close check-up on bicycles on the No. 20 highway without lights or reflectors.

A Westinghouse Radio has been installed in the Beach School for the month of May by Mr. Harold Metcalfe through the courtesy of Mr. W. K. Gibson.

Will the ladies of St. Andrew's kindly send their articles for the Rummage Sale either Friday night or Saturday morning.

With the circulation of chain letters in the town and district, it is reported that one man received about \$10 in dimes one day last week as a result of his name appearing in the letters.

The stop light at the corner of Main and Depot streets was turned on last Wednesday and with the heavy traffic over the holiday materially assisted in regulating traffic.

The members of the Sunday School of Trinity United Church will attend the morning service on Sunday next in a body. The regular session of the school will not be held.

Members and officials of the town and township councils attended divine service in St. Andrew's Anglican Church on Sunday evening when a Service of Thanksgiving for Protection afforded to the King's Majesty during twenty-five years, was held.

The monthly literary meeting of the I. O. D. E. will be held on Monday, May 13th at three o'clock. An interesting program has been prepared including a paper on India and two numbers by Mr. G. L. Eaton's choir. Every one is welcome.

It is interesting to note that a high school Glee Club Chorus organized at Brampton and directed by Mr. Roy Wood, formerly of the local high school staff, was successful in securing first place at the music festival held at Port Credit last week. Many friends here will be pleased to learn of the success which has attended his efforts.

Lloyd Pettit, a member of the local fire department, while responding to an alarm last week, had the misfortune to damage his motor car to the extent of \$35.00 when, in order to avoid striking a boy on a bicycle, who it appears, swerved directly in the path of the car, he was forced to swerve into the curb.

The regular monthly meeting of West Lincoln Branch, Canadian Legion, which should have been held Thursday evening May 9th has been postponed until Thursday evening the 10th, when it will be held at Council Chambers, Grimsby. It has been necessary to postpone the meeting owing to the fact that some negotiations with the Provincial Command have not yet been completed.

In the Baptist Church, on Sunday morning, the members of the congregation and of the Sunday School will meet in a special Mothers' Day service at eleven o'clock. The speaker will be Rev. Caleb Harris, B. A., of Wentworth St. Baptist Church, Hamilton. All friends and especially mothers of Sunday school children, are heartily invited to this service. The minister will conduct Mr. Harris' morning service in Hamilton.

The Elocution Contest in connection with the Blossom Time Music Festival was held Monday afternoon, the judge being Mr. Walter McRae. Miss Beryl Chivers, daughter of Mr. and Mrs. A. J. Chivers was successful in winning first place and was complimented on her rendering of the contest poem, "One, Two, Three," by Henry C. Hinner. Miss Audrey Palmer, daughter of Mr. and Mrs. Charles Palmer, won second place. Both are pupils in Elocution of Mrs. George E. Bolton.

The Euchre party held in the I. O. O. F. Hall on Tuesday, April 30th was incorrectly reported in the last issue as having been held under the auspices of Grimsby Chapter, No. 120, O.E.S., it being sponsored by Alekisa Rebekah Lodge. Among those who assisted on the entertainment and refreshment committee was Mrs. A. A. Mabe and Miss E. Greig, assisted on the entertainment committee, their names having been inadvertently omitted from the item.

MR. LIMP had calluses so bad he used a cane. Cress Corn Salve banished them forever. At Dymond's Drug Store.

POLICE COURT
On a charge of unlawful possession of liquor not obtained on their permit, Peter Kolin, John Jankowski, Harry Bower and James Eloff, all occupants in the same house on Robinson Street, North appeared in local police court here on Tuesday. B. Trapnell of St. Catharines appeared for Eloff while the other three were defended by G. B. McConachie. All four pleaded not guilty. An adjournment was granted and trial set for Friday on request of G. B. McConachie.

Kolin and Eloff were granted bail of \$200. cash or \$500. property bond each. The other two were allowed to go on their own recognizance of \$500. each.
Gordon Dean, charged with exceeding the speed limit in Grimsby failed to appear.

Jubilee Services In St. Joseph's And St. Martin's Church

On Sunday Father Canning arranged to have a special Mass of Thanksgiving on Monday at 9 o'clock for the people to pay their debt of thanks to Almighty God for the blessings we have enjoyed under the twenty-five years' reign of their Sovereign, King George V. Speaking to his people Father Canning said:

"The Silver jubilee of the accession to the throne of Great Britain of our most gracious Sovereign is an occasion of great rejoicing and thanksgiving. To their Majesties, our King and Queen, we extend our filial sentiment of loyalty and devotion and we pray that God will bless them with health, happiness and well being, thus fulfilling the teachings of St. Paul: 'I desire, therefore, first of all that supplications, prayers, intercessions and thanksgivings be made for all men, for Kings and for all who are in high stations.' Speaking further the preacher explained that 'A King's riches are the hearts of his people' and that 'Love of Country is not only a Civic Duty but a noble Christian virtue.' The roots therefore of your loyalty to your King are in your religion. For 'By God alone do all lawful rulers reign. There is no power but from God. Christ taught in the Gospel according to St. John 19, Chapter 10 and 11 verse and St. Peter in first Epistle 2nd chapter 17th verse 'Love God, honor the King, and obey all lawful authority.'"

We, as Catholics, will love and honor our King because our church teaches

CARELESSNESS is TOO COSTLY!

PASSING on a hill is just one form of haste . . . that craving to drive too fast . . . which is altogether too prevalent in Ontario.

The appalling number of motor accidents in this province means a drastic check-up on reckless drivers. Public sentiment, speaking through the courts, will be increasingly severe towards unreasonable, thoughtless motorists. You know what you should do. How you should drive. So, for your own safety and that of others, *drive carefully!*

IT IS BETTER TO BE SAFE...THAN SORRY

MOTOR VEHICLES BRANCH
ONTARIO DEPARTMENT OF HIGHWAYS

THIS MUST STOP!

In Ontario, during 1934, there were nearly 10,000 automobile accidents.

512 people were killed
8,990 people were injured

... a considerable increase over 1933. It must be evident to all thinking people that this must stop.

Hon. T. B. McQuesten,
Minister of Highways

Mr. William Stephen of London spent the weekend at his home here.

Mr. and Mrs. William Hewson and daughter, Virginia spent the weekend in Detroit, Mich.

Mr. Wylie Theal, of Delhi, Ontario, spent the weekend at the home of his parents, Mr. and Mrs. Richard Theal.

Mr. and Mrs. G. G. Byers, Nelles Boulevard, have returned after spending the winter at St. Petersburg, Florida.

Mr. Douglas Farrell of Toronto is spending a two weeks' vacation with his parents, Mr. and Mrs. H. H. Farrell.

Miss Mae Glen of Niagara Falls, Ont. and Miss Nan McLeod of Toronto, spent the weekend with Mrs. Jas. Strachan, Main St. West.

Mrs. Home, Main Street east, had as her guests over the weekend holiday, Misses Lewis and Dunham of Toronto and Dr. and Mrs. H. Schway, Bereton Harbour, Michigan.

Rev. C. C. Kaine of Seaford is visiting at the home of his son, Mr. and Mrs. I. B. Kaine for a short time, while Mrs. Angus Inglis of Englehart, mother of Mr. Kaine is also spending a week here.

Dr. and Mrs. J. H. MacMillan entertained about 250 friends at an enjoyable dance and bridge at Deer Park Golf and Country Club on Monday evening, the music for dancing being supplied by Denzel Payne and his orchestra.

On Tuesday evening of last week, Mr. William Hewson and Mr. C. D. Millard entertained about fifty gentlemen friends at Deer Park Golf and Country Club in honor of Dr. Gordon A. Sinclair, prior to his marriage this month. The evening was spent in games and two comedy skits were presented to add to the enjoyment of the evening.

On behalf of those present Dr. Sin-

THOU SHALT NOT KILL!

Drive Carefully!

YOU NEED RAPID GROWTH IN MAY AND JUNE CHICKS

MAY and June hatched chicks are not too late to make laying pullets before the good laying prices fall off. It's a fact that chicks must have a superabundance of vigor and growthiness bred into them before they will make early layers. But that's why Bray's "Extra-Profits" chicks hatched from BIG eggs fill the need so well for rapid growing chicks at this time of year.

Our BIG hatching eggs (25 oz. up to 30 and 32 oz. per dozen) generally come from the bigger, more productive hens in our breeding flocks — and, in turn, the chicks from BIG eggs inherit the unusual vigor and growthiness of their mothers. It's true that buying GOOD chicks in itself is not enough to assure you of an early laying flock. But with ordinary good management and good feeding, Bray's "Extra-Profits" pullets will begin laying at 4 1/2 to 5 months old. We know of many Bray flocks that were laying 90% at 6 months.

You'll be in on winter egg money in December and January if you buy "Extra-Profits" chicks, feed them well and give them ordinary good management this summer.

Our prices on May and June hatched chicks are particularly attractive. And you can save \$1.00 per hundred by placing your order 30 days in advance. A 10% deposit books your order. Stop in and get our catalogue and our new price list next time you have a chance.

OBITUARY

The funeral took place on Sunday of Miss Annie Hammond, of Beamsville, who died at the home of her sister, Mrs. Edward Corry, Rev. H. W. Wright of the Baptist church, officiated at the service. On Monday, May 6, the remains were conveyed by motor coach from her late residence to Ottaville for interment. The late Miss Hammond, who was in her 71st year, leaves to mourn her four sisters, Mrs. Mitchell, East avenue, Beamsville, Mrs. Edward Corry, Beamsville, Mrs. Dunsmore of Franklin, Manitoba and Mrs. Moore of Ottaville.

claire was presented with a handsome Simmons All-Steel upholstered bridge table and chairs.

At the invitation of Mr. and Mrs. A. Hewson the members of the Choir of Trinity United Church held a social evening at their home on Nelles Boulevard on Friday last when a delightful few hours was spent in music and games, the serving of refreshments concluding a very pleasant evening.

Mr. and Mrs. H. C. VanEvery and family of Kitchener were visitors at the home of the latter's sister, Mrs. C. S. Bean on Monday. They were accompanied on their return by Mrs. B. E. Dechtel who will spend some time with her daughters in Kitchener.

Miss Hilda Devitt and Miss Pfeiffer of Waterloo called on friends in Grimsby on Monday.

Misses Erma Merritt and Doris Saunders of Beamsville were joint hostesses at a miscellaneous shower at the former's home on Thursday evening last in honor of Miss Margaret Johnson, whose marriage to Mr. Ronald Russ took place on Saturday. About fifty friends were present and a most enjoyable evening spent. The guest of honor was showered with many gifts from her friends together with best wishes for the future happiness of the young couple.

Misses Margaret McCartney and Hilda Mould were joint hostesses on Wednesday evening at the former's home at a pantry shower in honor of Miss Sadie Phipps whose marriage takes place this month to Mr. Kenneth Nelson. About thirty-five friends of the bride-elect were present and an enjoyable evening of euchre and bridge spent. The tables were later set with delicious refreshments and following lunch the many useful gifts were opened by the guest of honor together with best wishes from her friends which she suitably acknowledged.

Two Plays Were Given Excellent Presentation by St. Andrew's A.Y.P.A.

A most enjoyable program of variety in entertainment was presented on Wednesday evening of last week under the auspices of St. Andrew's A. Y. P. A. in the Parish Hall.

The greater part of the evening was taken up by the presentation of two plays, the first entitled "A Sky Full of Stars" having been cleverly dramatized by Florence Hollis a member of St. Andrew's A. Y. P. A. The cast comprised Katharine Ponton, Nem Bourne, Leila Biggar and Strachan McCaskill.

The second was entitled "The Jewelled Hand" which was remarkably well played and left no doubt in the minds of the audience as to these players being well-deserving of the high position they attained, that of second, in the recent Lincoln and Welland Drama Festival.

The players, Madeline Croft, Sheila Coomber, Nem Bourne, Gerald Liddle, Vernon Croft, Cora Neale and John Bradshaw, were all well suited to their parts and received enthusiastic applause from the audience in both plays.

At the opening of the program and during the intermission between the two plays a most enjoyable program was given by the following: Neil Miller, violinist, who was called upon for several extra numbers in the absence of Miss Ruth Tallman, soloist, who was unable to be present, Mary Liddle and Margaret Demill, tap dancing, David Biggar and Vernon Croft, Guitar and Hugh Liddle, soloist. The audience applauded the artists, who were called back for encore numbers.

Miss Florence Laing who so capably directed the players in preparing the plays, was, at the close of the program, made the recipient of a small gift in recognition of her much-appreciated efforts, the presentation being made by Miss Leila Biggar, on behalf of the cast.

GRIMSBY HONOURS THE KING IN JUBILEE CELEBRATION (Continued from Page 1)

Mr. McRae most interestingly reviewed the events of the reigns of the various Kings of England through the centuries and alluded to the outstanding occurrences which took place during those reigns. He referred to the fact that the reign of the present King had been marked by outstanding progress in all fields of endeavour.

It was noteworthy that the King in his talks to his people referred to himself as a servant of his people and regarded them as all members of a

CORN BORER ACT

TO BE STRICTLY ENFORCED

All Corn Stalks and Stubble must be plowed under clean or burned by May 20th.

Information may be obtained from the undersigned, W. LEIDEN, Vineland Station, County Corn Borer Inspector, Phone 627-11 Vineland or Irvine Olmstead, Grimsby.

great British family, said Mr. McRae. This was in marked contrast to other rulers and their attitude towards those over whom they ruled.

During the course of his address, Mr. McRae favored the large gathering with a number of readings from the works of Rudyard Kipling. He eloquently recited "The Recessional" by Kipling which was particularly fitting, concluding his stirring address with the words "The King-God Bless Him."

During the afternoon Rev. Mr. Merritt read the address of Fealty sent by the County of Lincoln to His Majesty, The King.

Special interest was lent to the occasion by the presence of the school children who under the direction of Mr. Eaton appropriately sang the numbers, "Gentlemen of Eng-

land" and "Rule Britannia", the program concluding with the singing of the National Anthem.

Mr. T. L. Dymond presided at the piano.

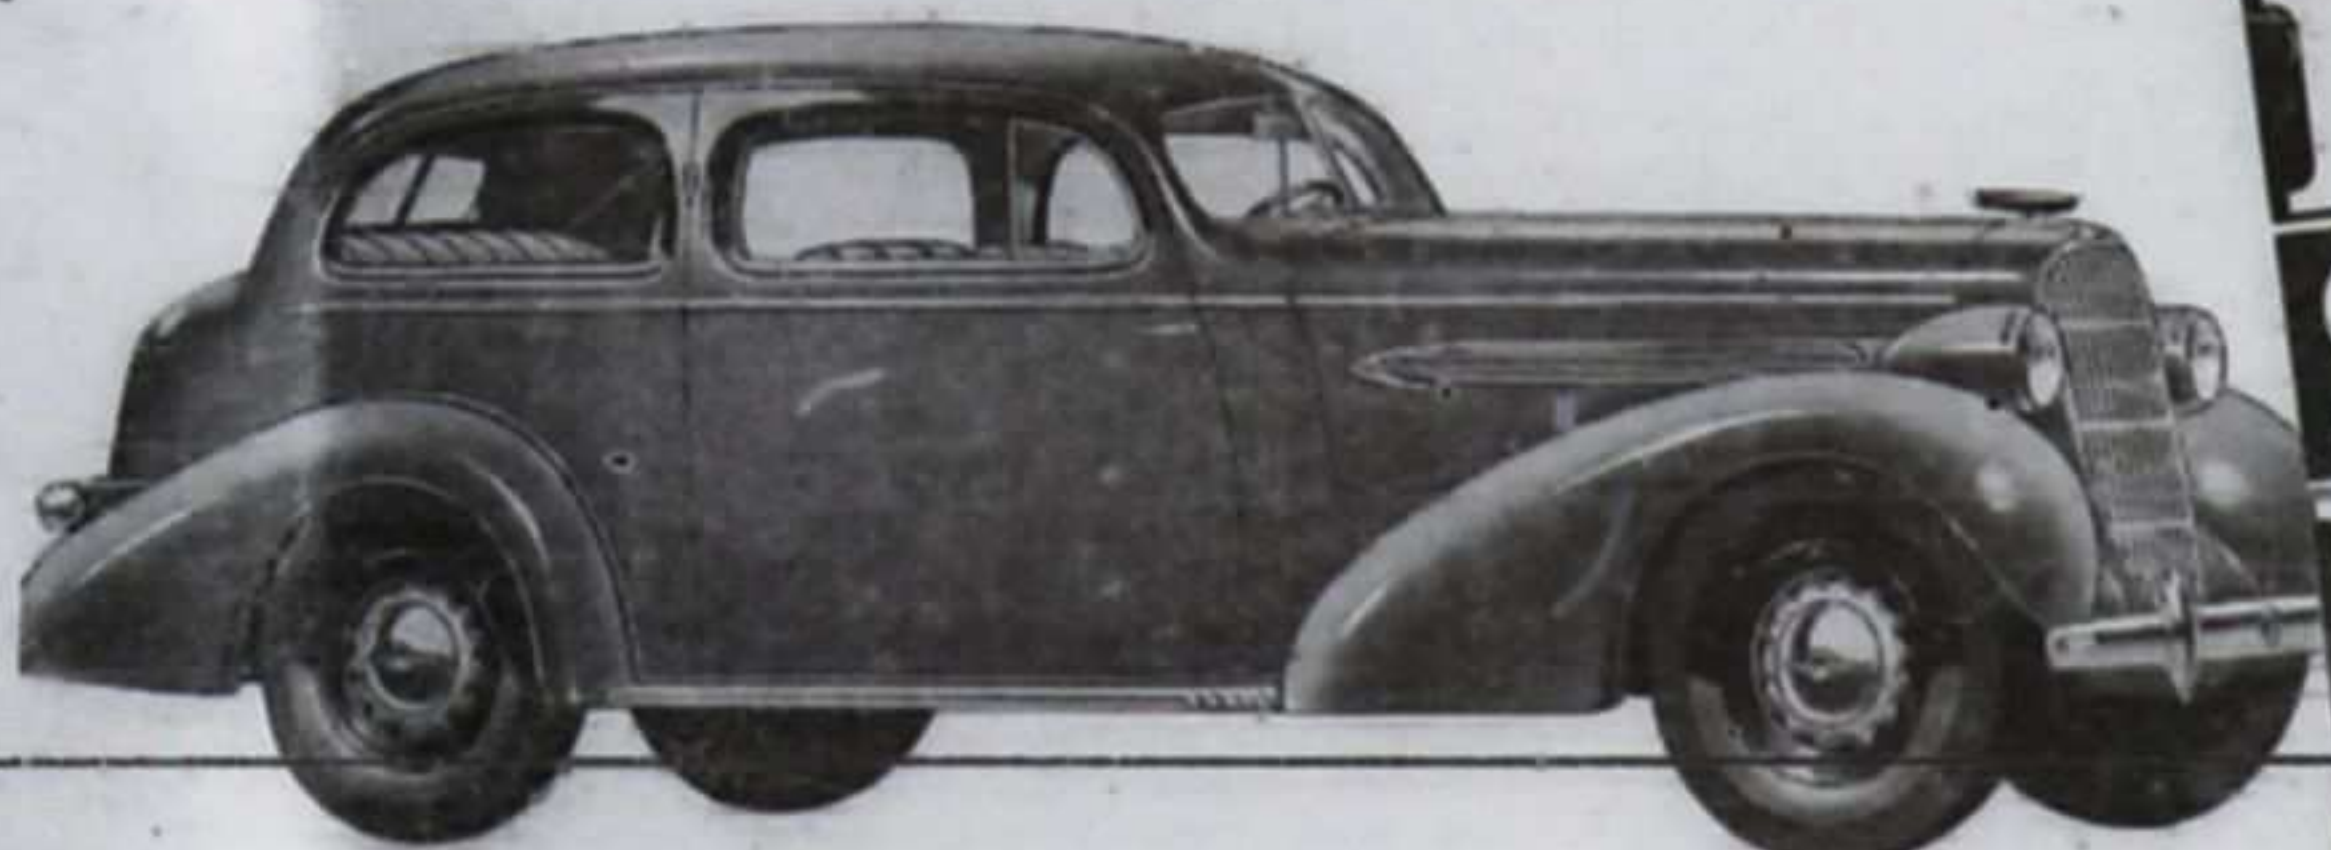

Mayor McPherson extended hearty thanks to those who had taken part in the program which was sponsored by the L.O.E.

Owing to the wetness of the grounds at the Public School a softball game was played in the afternoon.

Light Huge Beacon

The day was brought to a fitting conclusion in the evening by the lighting of a huge beacon fire at 10 o'clock on top of the Niagara Escarpment by members of the A.Y.P.A. of St. Andrew's Church. The beacon was visible for many miles along the lake shore.

Talk it over with a friend who owns an OLDSMOBILE...

A GENERAL MOTORS VALUE

WITH so many cars making so many claims to superiority, you may be finding it difficult to decide on your next automobile. If you have reached this point, why not fall back on the judgment of one you can trust... a friend. Among those you know are men and women who have bought 1935 Oldsmobiles. Talk to them.

Of course, first thing, they'll call your attention to the Solid Steel "Turret Top" Body by Fisher. They will point out the convenience of the Concealed Tire and Luggage Compartment. They will explain the advantages of Knee-Action... All-Sun! Syncro-Mesh Transmission... Centre Control Steering... Hydraulic Brakes... and Fisher No-Drift Ventilation. In other words, they will unconsciously tell you how every detail of the Oldsmobile is designed for your comfort and convenience.

Why not come in and let us suggest how easily you can own an Oldsmobile through liberal allowance on your present car plus the convenient terms of GMAC.

PRICED FROM \$1037

SOFT BALL SEASON SOON TO OPEN (Continued from page 1)

The diamond will be in fine shape this year and it should be fast. There was a lot of money spent last year on the diamond and as a result the ex-

ecutive just broke even at the end of season and no money was wasted. As the opening comes along there can be more said as to the line up of the local team but the fans can rest assured, manager McBride will do the best he can with the material he has got.

Feminine Tars

It isn't unusual for Russian women to go to sea for a livelihood. Here are three members of Russian freighter Kalinin. Left to right: Anna Tymanina, third officer; Tamara Ostericheno, motorist, and Mrie Lemenad, stewardess.

Riding "Applesauce"

Hanging on, but nearing the end of his wild ride is this cowboy at a ranch rodeo. "Applesauce," a most unwilling steed, lives up to his name as he shows he's boss.

Baden-Powells Arrive In Canada

Lord Baden-Powell, Chief Scout, and Lady Baden-Powell, chief of the Girl Guides, are shown here with their two daughters, Hon. Betty (left) and Hon. Heather Baden-Powell, as they reached Victoria from Seattle, starting their tour of Canada. Sun-tanned and looking extremely fit, the Chief Scout presented a vigorous, alert appearance when he stepped on British soil again, at Victoria to receive a rousing welcome from Vancouver Island's Scouts, Guides, and leaders of the movement.

Toronto Scientists Find One Secret of Childbirth

Change in Hormone in Blood Brings On Labor, Detroit Parley Is Told

Detroit.—The mechanism which causes labor in childbirth has been discovered by three scientists at the University of Toronto, it was disclosed recently at the meeting of the Federation of American Societies for Experimental Biology.

Dr. G. F. Marrian, Dr. S. L. Cohen and Dr. M. Watson have found that "labor" results from changes in the chemical condition of a hormone in the blood of the pregnant woman. This hormone, known as estrin, is manufactured by the ovaries.

ESTRIN FREED BY COMPOUND. During pregnancy, this hormone is present in the form of a complicated chemical compound, Dr. Marrian said. Estrin is freed from the chemical compound.

Dr. Marrian concluded that labor is caused by freeing of the estrin and its utilization by the body of the mother.

Dr. I. C. Reed, Dr. M. L. Rathaway and Dr. H. C. Struck of the

University of Illinois College of Medicine, reported successful treatment of seven cases of arthritis with vitamin D.

In arthritis, there is frequently a falling off in the calcium and phosphorus content of the blood. They found that daily treatment with vitamin D, which contains vitamin D, remedied this, with considerable improvement in the general condition of the patients.

Dr. D. Roy McCollie, Dr. J. P. Stimmer, Dr. J. P. Stimmer, described the development of a method for determining the amount of thyroid hormone present in the blood stream. This hormone is secreted by the pituitary gland and controls the activity of the thyroid gland. It is believed that the over-abundance or deficiency has much to do with the exception of goiter and other diseases of the thyroid.

METHOD DEVELOPED

The two Cleveland experimenters have developed a method by which the sample to be tested is injected into the thyroid of a guinea pig. Measurements are then made of the decrease of this iodine content of the guinea pig's thyroid gland.

Dr. W. C. Lines of Georgetown University reported changes in the chemical nature of the fingernails of persons suffering from arthritis. Normal fingernails contain certain amounts of arginine, histidine and lysine. The percentages of these substances present undergo a definite alteration in arthritis, he found indicating that this may prove a clue in the investigation of the primary causes of arthritis.

"But your fiancé's salary is so small how are you going to live?" "Oh, we're going to economize. We're going to do without some things that Tom wants, a lot of

Fashion Fads

Notes From A Paris Correspondent On The Newest Fancies

There was no limit to the novel ideas to be gleaned at the Paris fashion shows. Here, for instance, are some by Schiaparelli:

Yellow paiseley handkerchief knotted round the neck of a white linen blouse.

Terra cotta canvas dress with short sleeves and a kangaroo pocket in the centre front.

Navy blue linen coat cut on swag-line and closed by means of three leather clips in front.

Navy costume jacket closed from hip to throat by means of scarlet buttons and alternate red and green buttonholes.

In the front of a white linen sports blouse the initials and the year 1935 embroidered in red and surrounded by a little pierced heart in the same fine red embroidery.

And here are some of Patou's ideas: The use of bugle trimmed net for evening gowns.

Glazed brown holland used as revers on a navy blue suit.

Sailor hat in transparent spun glass trimmed with black ribbed ribbon.

A mustard woollen sports coat cut on swag-line and with full three-quarter sleeves brought in tight below the elbow, worn over a plain white crepe sports dress.

Raglan sleeves shirred from neck to elbow as the chief point of interest in a plain restaurant dress in black marocaine. The skirt is long and the bodice cut in a low V in the back. With this dress is worn a little toque made entirely of flame-colored ostrich feathers.

BUTTONS ON TO THE DRESS

Illustrated Dressmaking Lesson Furnished with Every Pattern

2877

In this gay little home or porch frock, one could easily go to market or even wear it to the beach next summer.

You'll feel so comfortable, too, with the assurance that you are wearing a smart dress, to answer a ring of the door bell. The apron is easily removed, for it buttons on to the dress.

It's a dress that you'll find very simple to wash and iron. Nautical blue pique dotted in white with plain white carried out the original ensemble.

Plaided seersucker with crisp white organdie makes a very effective scheme, for this simple to sew ensemble.

Style No. 2877 is designed for sizes 14, 16, 18 years, 36, 38, 40 and 42-inches bust. Size 36 requires 3 yards of 35-inch material with 2 1/8 yards of 35-inch contrasting and 1 1/2 yards of binding.

HOW TO ORDER PATTERNS

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 15c in stamps or coin (coin preferred—wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

This Terrier Is Fun To Do Says Laura Wheeler

DOG PATTERN 795

This wire-haired pup will be a popular toy or mascot. He has all the vim and pertness of the real one, and you can make him as gay as you choose, according to the material you select. He is a simple animal to make and will afford the needlewoman pleasure in the making. Pattern 795 comes to you with a pattern for making the dog; detailed directions; and material requirements. Send 20 cents in stamps or coin (coin preferred) for this pattern to Needlecraft Dept., Wilson Publishing Co., 73 Adelaide, West, Toronto.

Mrs. Roosevelt Entertains Children

While their mothers were attending session of the D. A. R., Mrs. Roosevelt entertained the Children of the American Revolution at the White House. They are pictured having a joyous time.

The Robin's Song In Early Spring

When all the unstable tides of hidden thought Beneath the eager consciousness of mind Rush into sudden flood, unrest has sought A word serene that calm and peace may find. It comes at eve, when deepening shadows brood— Bell-like, as from some hollow glass, where falls Distilled pure loveliness and solitude: A note of mystery—new life that calls.

The calm of love is in it, and content. With vision of sure gladness, beauty known To countless generations; fulness spent Before fulfilment, perfectly its own.

This is the Robin's song when lag-gard snow Still holds the prisoned blossom in the sod; Rich beauty which a bird can keep and know— A vocal certainty of trust in God. —Minnie Hallowell Bowen, Sherbrooke.

The Boy And His Knife

The big business man had forgotten his penknife, and apparently the members of his staff had done likewise. Everyone he asked shook their heads. Finally, he sent for Thomas, his diminutive office boy.

"Have you got a penknife?" he asked, sharply.

The boy dived into his trousers pocket and produced the necessary article. The business man gladly accepted it.

"How is it, Thomas," he said, "that you're the only member of the staff who carries a knife with him?" "I suppose," replied the boy, with a frank smile, "it is because I can't afford more than one pair of trousers."

—Calgary Herald.

Russian Balm

\$150,000 worth, is sought by Cera Irene Sund from Captain Michael Paul, former Russian army officer. Miss Sund claims that the flashing officer of the Czar won her heart and then broke it by jilting her.

ANECDOTES

In the days long before the world war, John Buchan—later Governor-General of Canada—was one of the editors of the "Spectator," and, chuckles A. St. John Adeock (in "Cuds of Modern Grah Street"), if you will look up "The Brain of the Nation," by Charles L. Graves, who was then assistant editor of that famous weekly, you will find among the witty and humorous poems in that volume a complete biography of Buchan in neat and lively verse, telling how he came up to London from Oxford, went to South Africa as Lord Milner's private secretary, returned to England and became a familiar figure in the "Spectator's" old offices in Wellington Street, London—just off the Strand, you know.

Here is John Buchan at the "Spectator" offices—pictured by Chas. L. Graves: "Every Tuesday morn careering Up the stairs with flying feet, You'd burst in upon us, cheering Wellington's funeral street...."

Pundit, publicist and jurist; Statistician and divine; Mystic, mountaineer and purist In the high financial line; Prince of journalistic sprinting— Swiftest that I ever knew— Never did you keep the printers Longer than an hour or two.

Ten, too, when the final stages Of our weekly task drew nigh, You would come and pass the pages With a magisterial eye. Seldom pausing, save to smoke a Cigarette at half past one, When you quaffed a cup of Mocha And devoured a penny bun."

Theodore Thomas, first conductor of the Chicago Symphony Orchestra, at the age of 60, discovered he was becoming bald. The drafts encountered on the great stage of the Chicago Auditorium helped him to that discovery—which most men make sooner or later. So he got himself a toupee, after trying out a jockey cap which was all right for rehearsal, but a little disorderly for public appearances.

The first time Thomas was to appear at a rehearsal wearing his toupee, says Charles Edward Russell (in "The American Orchestra and Theodore Thomas") he waited in his room until the players were in their places. Then he marched out before their astonished gaze and turned his back.

"Now laugh," he said, and added with peculiar emphasis, "once!"

The most famous beard in the world was blue in color. Monsieur Charles Perrault, author of that nervous delight of the nursery, "Bluebeard," was Superintendent of Public Buildings in Paris under Colbert. He retired in early middle age to devote himself to literature and the education of his children and wrote for their amusement a book of immortal fairy legends. It contained, in addition to "Bluebeard," tales of equal fame in "Little Red Riding Hood," "Sleeping Beauty," "Cinderella," and "Puss in Boots."

The cruel husband with the azure beard, whose disobedient wife found the corpses of her predecessors in the room she was forbidden to look into, was actually taken from life, says Edwin Valentine Mitchell (in "Concerning Beards.")

During a visit King George and Queen Mary made to the Ideal Home Exhibition, the Queen's chief joy was reserved for the gardens. She called her husband to look at a group of starry-eyed gentlemen, which had been coaxed into growing at the side of a little pool.

"Don't you think we might try some of these in the rock-garden, George?" she said, thinking of Sandringham.

The King thought they were charming, but told his wife laughingly not to have them planted in the part of the grounds where "Happy"—his dog—was allowed to wander.

"Happy likes eating small flowers," said the King, "he thinks they won't be noticed."

Soup Spoon Need Not Imitate Saxophone

New York. — College youth had something new to worry about last week—counsel that they learn to play saxophone and sip soup silently.

Both can be done, too, according to Mary Berin Barker, wife of a Columbia dean.

Pointing out, among other things that a soup spoon need not be played like a saxophone, Mrs. Barker has written a handbook for college men on "the technique of good manners." She wants a sewing kit in every rucksack.

"The idea that these things are women's jobs is worn out."

Mrs. Barker makes one concession to the campus diner-out: "the wife," she proclaims, "despite state laws to the contrary, may properly be seduced to eat the salad."

Other Barker bits: "In mat-mony aim high. You as college men are the potential leaders of the next generation."

MAY MEETING TOWN COUNCIL

(Continued from page 1)
conditions in town and try to keep our town neat and clean. If we allow inferior buildings we are going to have slum conditions," concluded the Mayor.

A building permit was granted to Earl Cromwell, Mountain St. No action was taken on the one referred to above.

10% Penalty Eliminated
Reeve Mogg commended the provincial government on the change in the Municipal Act, making the penalty for arrears of taxes the same in all municipalities. In municipalities such as Grimsby the charge will be one-half of one per cent. per month instead of 10% which had previously been added.

Appreciate Services
It was moved by Councillors Bourne and Chivers that a vote of thanks be tendered the ladies of the Welfare Board for their most unselfish services and most especially Mrs. Groce who has given so much time to the cause.

Court of Revision
A bylaw was passed fixing the Court of Revision for June 6th at 8 p.m., the court to comprise Mayor McPherson, Reeve Mogg and Councillors Lewis, Wilkins and Palmer.

Jubilee Participants Thanked
On motion of Councillors Lothian and Wilkins the council placed on record its appreciation of the work done by the ladies of the I. O. O. F., the local ministers, Mr. McTay, G. L. Eaton, the Grimsby Band, Mrs. Mure, the A.P.P.A. and all those who helped to make possible the local celebration of His Majesty's Silver Jubilee.

Grant To Band For Services
The finances of the band were again the subject of discussion and it was decided to reimburse them for expenses incurred in connection with the Silver Jubilee celebration on motion of Councillors Wilkins and Chivers. It was granted \$52 to cover outlays on that occasion.

A committee to meet with a view to devising ways and means of securing funds for the band so that it can carry on.

The business of the report of the May meeting will appear in next week's issue, being held over owing to lack of space.

FUNERAL LAST WEEK

The funeral of Mrs. Charlotte Fish-

er, aged 74 years, who passed away at her home in Jordan HAMILTON, ON SATURDAY, was held on Tuesday, April 30,

with Rev. C. A. Albright, of Jordan United church officiating. Interment was made in Oak cemetery, Jordan.

the deceased being relatives of the deceased lady. The family of the deceased has been in the employ of the

P. H. Wismer family at Jordan Station in the neighborhood of 25 or 30 years.

If you want a truly modern car at the lowest cost, be wise—choose a Master Chevrolet! Here is why: Chevrolet is the only lowest-priced car of 1935 that gives you a full complement of 1935 features! The new TURRET TOP roof construction, for example. Do you realize that no other car in Chevrolet's class offers you this modern, overhead protection of solid, seamless steel?

Then there's KNEE-ACTION. Do you know that the Master Chevrolet is the only low-priced automobile that gives you the Knee-Action "gliding ride"—and balanced weight in the bargain!

That is only mentioning two of Chevrolet's five outstanding, and exclusive features. We could go on to talk about Cable-Controlled Brakes—Fisher No-Draft Ventilation—and the Blue Flame Engine.

But if you will simply demand the modern protection of a solid steel roof above you—and the modern riding ease of Knee-Action wheels under you—you can't go wrong in choosing your next new car. You'll choose a Master Chevrolet, for quality that is all the more modern because the cost is so low!
